Kelly® specializes in providing strategic workforce solutions to the engineering industry, with decades of expertise in bringing companies and engineering professionals together at work.

Kelly has been a global leader in engineering recruitment since 1965 and is one of the largest suppliers of contract engineers in North America. Many of the world's most well-known companies—in a wide variety of industries—depend on Kelly to fill their engineering talent requirements in product development, manufacturing engineering, automation and industrial controls engineering, plant and facilities engineering, quality engineering, sustainability, and other technical specialties.

Today, Kelly maintains a global network of company-owned and -operated offices. The engineering teams within our branches are staffed and managed by experienced engineering professionals in place to assist clients with their staffing needs. We recruit and place professionals including engineers of all types, drafter/designers, engineering technicians, project managers, engineering analysts, and other specialists.

Kelly has developed strong relationships within many engineering communities at the local, national, and global levels. We are affiliated with more than 30 industry associations, societies, and special interest groups located throughout the world. In addition, Kelly has strategic partnerships with some of the industry's most influential trade associations and media publications through its Future Engineers Scholarship Program.

## Milestones

- In 2012, Kelly surpassed the mark of more than 7,000 engineering professionals employed weekly throughout the Americas. Kelly ranked 4th of the 17 top engineering talent providers on the Staffing Industry Analyst's 2012 List of Largest U.S. Staffing Firms.

- In 2011, Kelly engineering contract employees worked 9.2 million total hours on customer assignments across all delivery models.
- In 2010, Kelly Project Services was launched, providing an additional way that we can deliver engineering talent to clients.
- In 2008, Kelly announced a partnership with the National Academy Foundation (NAF) to help high school students in urban and low-income areas around the country. The partnership has enabled Kelly to continue its outreach efforts and to create important benefits for NAF, for its students, and for our customers. Kelly has awarded more than 22 grants to date that academies use to pursue new ideas, create innovative programs, or fund special events to promote STEM in high school youth.
- In 2006, Kelly expanded its global presence with the launch of engineering-specific offices in Russia and Singapore. Kelly has more than 50 engineering-specific offices worldwide in locations including Canada, Germany, Hungary, India, Malaysia, Mexico, Puerto Rico, Russia, Singapore, United Kingdom, and the United States.
- Established in 2003, the Kelly Future Engineers Scholarship Program helps to support students of engineering, foster excellence in the engineering field, and alleviate a critical current and future shortage of highly qualified engineers. Our past scholarship recipients are today's engineers working in the areas of aerospace, biomedical, civil, and energy.
