

## Leading companies look to Kelly® Science for **INNOVATIVE SCIENTIFIC TALENT**

AS YOUR SCIENTIFIC BUSINESS AND TALENT NEEDS EVOLVE, it helps to have a strategic partner on your side. We're already connected with the specialized professionals that you've been looking for. Discover what collaborating with Kelly can do for your scientific business goals—thousands of companies already have.

### PREMIER COMPANIES AROUND THE GLOBE TURN TO KELLY FOR PROVEN SCIENTIFIC RESULTS:

- **The National Institutes of Health** selected Kelly for a highly specialized partnership in support of its **medical research initiatives**. Kelly delivered significant cost savings and specialized talent across 40 locations—with educational requirements spanning **associate degrees to multiple bachelor's, master's, and doctorate degrees**.
- A **medical device manufacturer** was in need of a reliable source of scientific talent. We onboarded more than **2,000 high-quality** candidates for the client and met their hiring deadlines with 99% accuracy.
- We have been providing **highly skilled niche scientific talent, including lab technicians and chemists**, to the world's largest publicly traded **international oil and gas company** for more than 20 years. The client's labs are staffed with 67 Kelly scientific employees, and safety-related accidents have been significantly reduced.
- A major **eye care products manufacturer** needed qualified, experienced technicians quickly. Kelly helped the client reconnect with a large pool of talent—ultimately saving **six months of training costs, equating to more than \$700,000**.
- A leading center for **scientific discovery and technology development** leveraged Kelly to **build an analytical department** from the ground up. Kelly placed critical talent that fundamentally shaped the ongoing success of the customer's local **clean energy and technology development program**.
- A **global technology leader in agriculture** partnered with Kelly to deploy an **innovative summer intern program**. The client has remained extremely pleased with the program for more than 10 years, and hires about 10% of the candidates that pass through the intern program—ultimately, **saving thousands each year in recruiting and hiring costs**.

### A SPECIALTY PROVIDER, AT YOUR SERVICE

We understand the needs of today's talent. Permanent work isn't for everyone. Many of the best scientific professionals are looking to gain niche skills, or a better work-life balance in the evolving gig economy. Kelly Science ensures that every solution will be designed for your company. It begins in a conversation with a workforce solutions consultant who has a scientific background and knows your space.
